

Milan Stankovic, PhD

Parisian startup founder (several created : 1 sold).
PhD in Artificial Intelligence from Sorbonne University.
10+ years of experience in Tech Leadership roles as CTO,
CPO, Director of R&D. Also photographer.

As a co-founder

by Thomas Houriez, Co-founder at Sépage

Milan is the kind of person who makes the impossible possible, always able to grasp the ins and outs of any situation to find a positive way out with a creative and bold solution. I have had the pleasure to work with Milan at Sépage, the AI startup which we founded, grew and sold in 4 years. This was only possible thanks to Milan's rare combination of scientific knowledge and entrepreneur skills, which enables him to make the leap between technologies and business opportunities. Working with Milan is not only a valuable experience, it is also a pleasure: Milan's wit and panache, as well as his taste for unorthodox ideas, turns any conversation into an opportunity to learn, laugh, and often both.

As a scientist

by Matthew Rowe, Computer Scientist at Oracle

Milan is a philosopher, in the true sense of the word, always able to see a problem, question existing solutions and address the problem from a lateral angle that others would never catch a glimpse of. I have worked with Milan in two capacities; paper collaboration and organisation. For the former I found him to be hard-working and intelligent, able to work to hard deadlines and come up with results that are demonstrable in his exemplary publication record. In terms of organisation I have worked with Milan on organising two workshops, in each case he has, again, worked hard and come up with innovative and novel solutions to encountered issues.

As a team leader

By Justin Boileau, Software Engineer at Blindnet

As a manager, Milan provides the perfect balance of guidance and autonomy, which allowed me to develop as an engineer while never being afraid to reach out for help. He creates a fun, fulfilling work environment that any driven individual should love to be apart of. Milan is respected by those who work for him, and he cares a lot for his employees.

As a mentor

by Jeanne Le Peillet, start-up founder at Sorbonne PEPITE

I met Milan as part of the Pépité startup support program at Sorbonne University, and he became my mentor to develop my startup Beink. An incredible opportunity for me because Milan has a very fine understanding of the people around him, their projects and motivations. He also manages to make the path to success very concrete! Being supported by Milan literally gives wings that I want everyone to feel.

As a teacher

by Claudia Roda, Department director at American University of Paris

Milan taught a course in "Semantic Web" for our Computer Science BS degree. He is very knowledgeable, reliable, and a great teacher/communicator. Our students have reported extremely positive comments about the course, its content, the ambiance in the class and their overall learning experience. I have no hesitation in recommending him as a very knowledgeable scholar in the Semantic Web field and a very pleasant colleague

Learning

Building companies and leading teams

Leadbay (FR)

Co-founder / CTO / R&D / Product

From 2023, Empowering B2B Sales with AI technologies. Fast growth and recognition as Future 40 at Station F.

Blindnet (USA, FR)

Co-founder / CPO / CTO

2020-2023, VC-funded, privacy technology startup. Hired and managed a full-remote team. Agile, OKRs and GitHub for project management. The strong team culture favored personal growth and acceptance (rather than fitting-in). Delivered several iterations of product and early traction. Featured in VentureBeat and MarketWatch. Closed down due to lack of further funding in 2023.

Sépage (FR)

CEO / Director of R&D

AI startup founded in 2013. Hired and managed a highly skilled team with a strong engineering culture, built award-winning¹ AI technology products, earned trust of the largest clients in the Travel Industry in France and abroad, got selected in FrenchWeb500 leaderboard of tech companies in France, and acquired in 2017.

Mentoring founders

As a part of PEPITE accelerator of the Sorbonne University in 2022 I served as a start-up mentor to Jeanne Le Peillet who won the national best project award from the French Minister of Higher Education and Research.

Product R&D

Software Components for Privacy

2020-2023, Blindnet DevKit made it easy to automate privacy requests. It pioneered a privacy metadata language combined with a rule engine to resolve requests against applicable regulations. It saved 5k EUR and 55h of work per data fetch/delete request.

AI Travel Recommender System

From 2013 to 2020, Sépage used Knowledge Graphs to recommend travel products that people actually ended up buying. It did it with ~5x less data than traditional machine learning systems, making it revolutionary in the context of e-commerce. Awarded best technology award multiple times, by travel industry leaders in France and UK¹.

Expert Finding System

2009-2012, Hypios expert platform used Knowledge Graph technologies to find unexpected yet relevant experts using clues from the Web and Social Media. CAC40 clients were impressed.

Governance

Member of the Academic Council – Research Commission of the Sorbonne University.²

Teaching

Java and Semantic Web courses.³

Science

Interests

I am interested in Artificial Intelligence, semantics, knowledge structures (such as the Web), and how those get intertwined with humans as they interact with each other and with information.

I am particularly interested in the (worryingly incomplete) quality of connectedness that information technologies enable and in everything that is still missing for them to get in sync with human cognition.

Contributions

I authored 60+ scientific publications in international journals and conferences focusing on AI, Knowledge Graphs and Social Web¹⁴. I acted as a reviewer in programme committees of 20+ international academic events (many of which A-level)⁸.

Occasionally I also write for think tanks and general audience media, such as Le Figaro¹¹.

Research leadership

Year after year, I co-lead a multidisciplinary workshop at the WWW/TheWeb conference – the most important conference in my field.

I was also invited to give a keynote talk⁹ and take part in Organising Committees of A-level conferences⁷.

I acted as co-editor of books and of a 3.5 impact factor journal special issue.¹⁰

Mentoring students

I served as co-mentor for Vincent Lully (Chun Lu) – thesis prepared at Sorbonne 2014-2018. Several publications at international A-level conferences.

Building perspective

Education

Information Science: PhD (Sorbonne University), MsC (University Paris-Saclay), Bachelor (University of Belgrade), and International AI Summer Schools.⁴

I went to the Fifth Belgrade Gymnasium.

Research Visits

I was invited to pursue my research visiting Computer Science institutes across Europe.⁵

Grants

My studies and research were supported by grant programs in Austria, France and Serbia.⁶

Annex

1 Technology Awards

[Amadeus & AirFrance T3 Forum, Paris 2016: Innovative Technology award for Globe Advent \(Sépage\)](#)

[EyeForTravel TDS 2015, London: Innovation in Travel Award for Globe Advent \(Sépage\)](#)

[Next Tourisme 2014, Paris: Technological Innovation Award – Award given by Heads of Digital Departments of AirFrance, Accor et Critéo, for Globe Advent \(Sépage\)](#)

2 Governance

2022-2024 Academic Council – Research Commission of the Sorbonne University

3 Teaching

2011, Semantic Web (in English), American University of Paris – Course design, teaching and student examination

2006-2007, Introduction to programming - Java, University of Belgrade – Practical work and student examination

4 Education

2009-2012 PhD – AI: Semantic and Social Web

Sorbonne University, summa cum laude

Semantic Web and Artificial Intelligence technologies applied to the tasks of expert search and unexpected yet relevant (serendipity) keyword discovery on the Web. <http://theses.fr/2012PA040247>

2008-2009 Research Master – Information Science

University Paris-Sud Orsay

Structured data, Semantic Web, Human-Computer Interaction.

2003-2007 Bachelor – Information Systems

University of Belgrade (Serbia), Faculty of Organizational Sciences

System Architecture, Software development, Algorithms, Artificial Intelligence. Project management.

Top 10 students award.

Additional education

Summer School of Semantic Web (SSSW 2009), Cercedilla, Spain

Summer School of Multimedia Semantics (SSMS 2007), Glasgow, UK

5 Research Visits

DERI Galway, Ireland – Spring 2009, by invitation of Dr. Alexandre Passant and Prof. John Breslin,

INRIA, France – Summer 2009, by invitation of Dr. Fabien Gandon,

University of Vienna, Austria – Summer 2008, By Invitation of Prof. Dimitris Karagiannis.

6 Grants

2009-2012 CIFRE Grant for PhD Research by French ANRT Agency

2010-2011 Serbian fund for Young Talent

2008 Scholarship of the French Government

2007 OEAD Scholarship of the Republic of Austria

2006-2007 Scholarship of the City of Belgrade

2004-2006 Scholarship of the Ministry of Science and Higher Education, Serbia

7 Participation in Organizing Committees of International Conferences

Extended Semantic Web Conference (A level). 2014. – Challenges Chair

Extended Semantic Web Conference (A level). 2015. – Challenges Co-chair

Making Sense of Microposts – Interdisciplinary Workshop (Co-chair and event co-founder) Workshop at the Extended Semantic Web Conference 2011 and WWW (the largest and the most important Web conference) from 2012 to 2015.

8 Participation in Programme Committees of International Conferences

World Wide Web / The Web Conference (2017, 2018, 2018, 2019, 2020)

International Semantic Web Conference – In Use Track (2011,2012,2013,2014)

Extended Semantic Web Conference (2011,2012,2013,2014)

Web Science Conference (2012)

ACM Hypertext and Social Media (2012)

The 7th International AAAI Conference on Weblogs and Social Media (ICWSM) 2013

I-SEMANTICS (2009-2014)

IADIS Information Systems (2009,2010)

Workshop on User Profile Data on the Social Semantic Web (2011)

Workshop on Trust and Privacy on the Social and Semantic Web (2010)

Interplay between Conceptual Modelling and Human-Computer Interaction (2013)

9 Keynote Speaker

Extended Semantic Web Conference 2018 (A level international Conference) Heraklion, Crete, Greece
